

Acid pH Adjustment

**CONCENTRATED LIQUID
LOWERS pH WITHOUT CLOUDING**

DANGER

May be corrosive to metals. Causes severe skin burns and eye damage.

May cause respiratory irritation.

KEEP OUT OF REACH OF CHILDREN

Acid pH Adjustment

**PO BOX 245013
MILWAUKEE, WI 53224
800.776.7192
www.sharecorp.com**

Keep only in original container. Do not breathe mist, spray. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. Wear eye protection, protective clothing, protective gloves. Wash contaminated clothing before reuse.

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

IF ON SKIN (OR HAIR): Take off immediately all contaminated clothing. Rinse skin with water/shower.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a doctor, a POISON CENTER. Call a doctor, a POISON CENTER if you feel unwell.

Absorb spillage to prevent material damage.

Store in a well-ventilated place. Keep container tightly closed. Store locked up. Store in corrosive resistant container with a resistant inner liner.

For industrial and commercial use only.

For additional information, see Safety Data Sheet.

WARNING:

This product contains, or may contain, trace quantities of a substance(s) known to the state of California to cause cancer and/or reproductive toxicity.

Please Recycle.

Dry skin, scale deposits on filter, pump pool walls and hazy water can be attributed to excessive alkalinity in swimming pool waters. **ACID pH ADJUSTMENT** is the most convenient approach to lowering the pH of pool water and neutralizing alkalinity. The liquid form eliminates the additional storage and dosage problem frequently encountered with pool pH and keeps alkalinity levels under control with **ACID pH ADJUSTMENT**.

DIRECTIONS

The amount required to lower the pH depends on the water's natural buffering capacity. Add 1 to 2 quarts directly to the pool at a point of strong agitation. Do not add to the skimmer or vacuum. Allow 15 to 20 minutes for thorough mixing, then retest the pH to see if it falls within acceptable limits (7.2 to 7.8) If pH tests greater than 7.8, repeat application.

NFPA® Ratings

Health: 3; Flammability: 0; Reactivity: 0

Contains/CAS Number:

Water/7732-18-5; Hydrochloric Acid/7647-01-0; Surfactant/Proprietary; Tallow Alkyldiamine Ethoxylate/61790-85-0; Acid Blue 93/28983-56-4
