Store locked up.

Dispose of contents/container to comply with local/regional/national/international regulations.

For industrial and commercial use only.

For additional information, see Safety Data Sheet.

Please Recycle.

GOOD GRAPE is a pleasantly scented solvent degreaser specially formulated to dissolve grease and fats in sewer lines, lift stations and grease traps. This product floats on the surface of the water to strip away fat and grease accumulations as water levels naturally rise and fall. Built-in emulsifiers entrap the debris and dissolved greases in the solvent to aid in complete removal. A built-in, color level indicator allows the operator to determine product level by visual inspection.

DIRECTIONS

Use 1/2 gallon of **GOOD GRAPE** per square foot of water surface. Apply when the lift station is at its lowest level by spraying or pouring directly down the lift station walls. It is recommended to maintain a 1 to 2 inch layer of **GOOD GRAPE** on the surface at all times.
