DANGER:

May be corrosive to metals. Causes serious eye damage.

PREVENTION:

Keep only in original container. Wear eye protection, protective clothing, protective gloves.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a doctor, a POISON CENTER.

Absorb spillage to prevent material damage.

Store in corrosive resistant container with a resistant inner liner.

DISPOSAL:

Offer empty container for recycling. If recycling is not available, discard container in trash.

For industrial and commercial use only.

For additional information, see Safety Data Sheet.

DEFLECT ultra-strength urinal cleaner is a powerful and highly concentrated blend that quickly dissolves tough uric acid salt deposits, mineral and scale buildups, rust deposits in drain lines and urinal systems. It attacks the primary source of odors in urinals. **DEFLECT** also has a special additive that changes the properties of hard surfaces, making soils easier to remove and providing a protective surface layer against future soils. It has a fresh clean fragrance leaving urinals and drains smelling fresh and clean. **DEFLECT** is 2 products in 1: it breaks up tough uric acid salt build-ups, mineral scale and rust deposits. The protective coating clings to pipes and urinal fixtures to prevent future build-ups.

DEFLECT

DIRECTIONS:

URINAL TREATMENT: Remove waste, debris, urinal screens and urinal blocks. Shut off automatic flush and remove as much standing water as possible. Pour 16 ounces into urinal and allow **DEFLECT** to work for 10-15 minutes while inside drain line. Place bowl swab over urinal and wet with

DEFLECT. Clean vertical surfaces with special attention to areas behind and under flush rim. Flush urinal several times to rinse away dissolved scale. For urinals that have been completely clogged or very slow draining, repeated applications may be necessary to completely dissolve all urinary salts and scale deposits inside drain line.

PLEASE NOTE: This product may have an adverse effect on certain porcelain, ceramic or antique finishes, terrazzo, and polished metallic finishes. This product should not be used on colored grout, marble, or glazed surfaces. If uncertain, test on an inconspicuous area before using.
