GLITZ is an acidic hard surface cleaner formulated for detailing automobiles and heavy equipment. This acid cleaner concentrate can be diluted to clean the body and windows of a vehicle, and remove brake dust and calcium deposits without harming painted surfaces or glass. GLITZ was purposely formulated without using hydrofluoric acid, making it a good alternative to more harsh acid cleaner concentrates.

#### **DIRECTIONS**

Always wear rubber gloves and suitable protective garments when handling GLITZ. Dilute 1 part GLITZ with 4 parts water. Starting with a dry surface, swab or spray GLITZ onto surface to be cleaned. Product can remain on surface for a maximum of 5 minutes. Using a pressure washer or high pressure hose, thoroughly rinse surface with soap and water.

NOTE: Always test on an inconspicuous area prior to use. Do not use product in direct sunlight, use in shaded area.

**DANGER  POISON**

MAY BE HARMFUL IF INHALED OR ABSORBED.

Do not take internally. Avoid contact with skin, eyes, and mucous membranes. Avoid breathing vapors or fumes. Use rubber gloves and eye protection when handling. Use with adequate ventilation.

#### **FIRST AID**

**If Swallowed:** DO NOT induce vomiting. Contact physician or poison control center immediately. Give affected person 1 to 2 glasses of water. Never give anything to an unconscious person.

**If In Eyes:** Flush eyes and under eyelids with cool water for at least 15 minutes. Obtain medical attention.

**If On Skin:** Remove contaminated clothing. Wash affected area with soap and water for at least 15 minutes. If irritation persists, obtain medical assistance. In case of contact with open wounds or broken skin, wash affected area with soap and water, then apply a topical antiseptic agent.
