

EPOXY-GRIP SPRAY COATING

White Anti-Slip Coating

Form: Aerosol Liquid

Color: White

Odor: Solvent

pH: N/A

Solubility (in water): Insoluble
(in mineral spirits): Soluble

Viscosity (CPS at 70°F): >40

Flash Point (ASTM D-7821): -142°F

Specific Gravity: 0.80 ± 0.05 g/cm³

Density: 6.68 ± 0.05 lbs/gal

Storage Stability (at 70°F): 1 year

Ingredients

C.A.S.

Acetone	67-64-1
Propane, Isobutane, n-Butane	74-98-6
Xylene	1330-20-7
Toluene	108-88-3

Great for use on...

- **Steps**
- **Ramps**
- **Showers**
- **Loading Docks**
- **Ladders**
- **Running Boards**
- **Boats**
- **Decks**

Coverage: Approximately 25 sq. ft.

Grit Size: 130 Micron

PREPARATION: The surface should be dry, clean and free of oil, wax, dirt, loose paint and other contaminants. Previously painted surfaces should be cleaned with a mild detergent, rinsed thoroughly and dried. Before initial application, a light, etch or sanding is recommended. Test a small area for compatibility and adhesion. The coating is self-priming on most surfaces.

DRYTIME: Dries to the touch in approximately 1 hour. Be sure the first coat is dry before applying a second coat. The rate of cure will vary with the film thickness, temperature and humidity. Allow 24 hours before opening to heavy foot traffic. Product will continue to cure for several days. Recoat in 3 to 6 months or as wear indicates.

USE DIRECTIONS: For optimal results apply with temperatures between 60°F and 90°F. Shake can well until marble rattles freely. For best results shake continuously during application. Spray in sweeping motion 12 to 15 inches from area being treated.

IMPORTANT: Clear nozzle after each use by inverting can and pressing valve for 2 to 3 seconds.
