

GREEN DEATH

Ready-To-Use, Non-Selective Grass & Weed Killer

Form: Liquid

Color: Clear to hazy, yellow

Odor: Mild

pH: 4.5 - 5.5

Solubility (in water): Soluble

(in mineral spirits): No data available

VOC Content (% by wt): Not determined

Flash Point (Closed Cup): No data available

Specific Gravity: 1.01 g/cm³

Density: 8.40 lbs/gal.

Storage Stability (at 70°F): 1 year

Ingredients

C.A.S.

Glyphosate, isopropylamine salt.....38641-94-0

Inert Ingredients.....Proprietary

For control of...

- Crabgrass
- Bahiagrass
- Dandelion
- Creeping Charlie
- Fennel
- Poison Ivy
- Poison Oak
- Johnsongrass
- Sandspur
- Chickweed

...and many more!

HOW TO APPLY: Adjust the spray nozzle to produce large droplets. Small droplets or mists are more likely to drift and cause damage to desirable plants. Spray the weeds until the leaves are thoroughly wet, but not past the point of runoff. If a desirable plant is nearby, a piece of cardboard or plastic should be used to shield the plant from the spray.

FOR BEST RESULTS: Apply when weather is warm (above 60°F) and sunny to stimulate systemic movement from foliage to roots. To avoid spray drift to desired vegetation, adjust spray nozzle to produce large droplets and spray when wind is calm. Spray foliage until thoroughly wet, but not past the point of runoff. Apply when weeds are small and actively growing; before seeds develop.
