

LIQUID ICE MELT

Ice Melt Compound

NSF Reg. No. 135288
Product Category: A5

Form: Liquid

Color: Colorless

Odor: Glycol/Alcohol

pH: N/A

Solubility (in water): Soluble
(in mineral spirits): Insoluble

VOC Content (% by weight): 5.0 - 15%

Flash Point (ASTM D-7821): >200°F

Specific Gravity: 1.10 g/cm³

Density: 9.18 lbs/gal

Storage Stability (at 70°F): 1 year

Ingredients

C.A.S.

Ethylene Glycol 107-21-1

Isopropanol 67-63-0

Use On...

- | | |
|-------------------------|------------------------|
| • Stairs | • Downspouts |
| • Sidewalks | • Hinges |
| • Bridges | • Locks |
| • Driveways | • Control Boxes |
| • Ramps | • Chains |
| • Loading Docks | • Linkages |
| • Water Mains | • Aircraft |
| • Fire Hydrants | • Rain Gutters |
| • Coal Conveyors | |

DIRECTIONS:

Coverage: 1 gallon per 500 – 750 square feet.

General Use: LIQUID ICE MELT is ready-to-use. DO NOT DILUTE. Spray, pour, or sprinkle liberally on surfaces covered with snow or ice. It will become diluted as it works, therefore reapplication may be necessary for heavy layers of ice, sleet, or during heavy rainfall

To Treat Glazed or Glare Ice: Score ice in a vertical or horizontal manner to assure thorough penetration, rapid thaw, and prevent runoff. Pour LIQUID ICE MELT into the scoring and allow it to penetrate. Remove slush by shoveling.

Sand Application: Add 5 to 10 gallons per cubic yard of sand. Spread treated sand at the rate of 50,000 to 60,000 square feet per cubic yard.
