OG 73 is a clear, odorless liquid that can be applied to nearly any surface. When applied, it dries to a clear film which protects against things like spray paint, marker, crayon and lipstick. OG 73's thickened formula adheres to vertical surfaces and is water-resistant, allowing it to be used outdoors. OG 73 will not yellow. OG 73 is ideal for use on painted, powder coated, electroplated, solid plastic or metal surfaces including signs, lockers, bathroom partitions, vending machines, doors, walls, windows, mirrors, and surfaces that cannot be repainted if defaced. After the surface has been vandalized, OG 73 can be peeled off or removed by rinsing with water and light scrubbing taking the graffiti with it. Depending on application method and thickness, OG 73 will cover up to 350-400 square feet per gallon.

DIRECTIONS

Mix well before using. Using a roller or paint brush, apply a thin layer onto a clean, surface and allow to dry to a clear film "barrier". On vertical surfaces, rolling may be preferred over brushing in order to prevent the product from running. Start at the bottom and work up.

Allow up to 1 hour dry time. If the barrier becomes defaced, simply remove the film by peeling or with a water rinse and agitation. Reapply a new barrier once the surface has dried.

Porous surfaces may require several coats in order for OG 73 to form a continuous film. Intended for use on enameled, powder coated, electroplated and solid plastic surfaces. In exterior applications, the barrier may wash away under extended or heavy rain.

FIRST AID

IF IN EYES: Flush eyes with water for at least 15 minutes. If irritation is persistent, contact a physician.

IF ON SKIN: Not expected to cause irritation. Wash skin with soap and water.

IF SWALLOWED: DO NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Contact a physician or poison control center immediately.

IF INHALED: Move person to fresh air. If irritation is persistent, contact a physician.
