

# JUST RED

## Electrical Equipment Coating

**Form:** Aerosol

**Color:** Red

**Odor:** Aromatic

**pH:** N/D

**Solubility (in water):** No data available  
**(in mineral spirits):** No data available

**VOC Content (% by weight):** 49.1

**Flash Point (ASTM D-7821):** -2.0°F

**Specific Gravity:** 0.77 - 0.85 g/ml

**Density:** 6.43 - 7.09 lbs/gal

**Storage Stability (at 70°F):** 1 year

<u>Ingredients</u>	<u>C.A.S. #</u>
Acetone .....	67-64-1
Propane .....	74-98-6
Iron Oxide .....	1309-37-1
Butane .....	106-97-8
Toluene .....	108-88-3

### For Use On...

- **Motor Windings**
- **Commutator Ends**
- **Field Coils**
- **Armatures**
- **Switchboard Parts**
- **Bus Bars**
- **other Exposed Metal Parts**

**PREPARATION:** Surface must be clean and dry before painting. For best results, use when can is between 70°F and 90°F. Previously painted surfaces should be cleaned with a mild detergent, rinsed and thoroughly dried. Test a small area for compatibility and adhesion.

**APPLICATION:** Shake can at least one minute before and occasionally during use. Spray surface with steady, even strokes at a distance of 8 to 10 inches. Several light coats give a better finish than one heavy coat. If clogging develops, turn spray button ¼ turn or remove and clean button slot. Do not stick objects into can opening. After painting, turn can upside down and spray for 2 seconds to clean spray button. Discard empty can in trash pick-up. Do not incinerate or compact.

**DRYTIME:** Dries to the touch in approximately 30 minutes. Be sure the first coat is dry before applying a second coat. The rate of cure will vary with the film thickness, temperature and humidity. Typical curing time is 24 hours. Recoat in 3 to 6 months or as wear indicates.
