GUIDE TO **SAFE AND EFFECTIVE SUNSCREEN**

Don't be fooled by sunscreen labels that boast of high SPF's. Anything higher than SPF 50+ can tempt you to be in the sun too long, potentially suppressing sunburn but not any other kind of skin damage. The FDA states any SPF rated above 50+ is misleading. For the safest and most effective sunscreen, make sure to use nothing lower than SPF 15 and nothing higher than SPF 50+, reapply often and make sure your sunscreen is rated as Broad Spectrum with an 80 minute water resistance duration time.

DEET Insect Repellent

This EPA registered formula follows the suggestion from CDC to reduce the amount of DEET concentration in insect repellents.

This newly approved EPA formula allows the DEET to be released in a more controlled and measured manner, permitting longer lasting performance, once obtained only by high concentrations of DEET.

This new water base formula is:

- Long Lasting
- Non-Greasy
- Non-Staining
- Low Odor

Bug X 30 Insect Repellent has all the claims necessary for a compliant skin protection program plus the packaging (towelette and spray) that makes it affordable to meet every application. Bug X 30 is EPA registered in all 50 states.

Bug X 30 Insect Repellent with 30% DEET is effective up to 7+ hours of protection against:

Mosquitoes, ticks, chiggers, fleas, gnats, red bugs, no-see-ums, sand fleas, biting flies, deer flies, stable flies, and black flies.

It effectively repels Mosquitoes and other insects carrying:
