**ML KISHIGO®**

PRODUCT CATALOG

Quality first,  
quality last,  
quality always.

For over 40 years we've made it our job to help you do yours. From day one we've dedicated ourselves to designing and manufacturing the best workwear in the industry. Every stitch and pocket, every design innovation, every thread checked, and rechecked ensuring wear that is dependable, comfortable, and visible. For us it all comes down to a simple word: quality.

Here we believe in doing the right thing, not the easy thing, and you can see it in every garment we make. It's our commitment to you, and your crew, because at ML Kishigo, quality comes standard.

**WARNING:** Cancer and Reproductive Harm  
[www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov)

Choose the right material for the right job.

### Prismatic ~ Wet conditions

This material reflects back color and utilizes thousands of micro-prisms that are covered by a transparent film. Due to this protective layer, it performs exceptionally well in wet conditions and resists abrasion compared to glass bead.

### Glass Bead ~ Warm conditions

Silver glass bead material is made of microscopic glass beads adhered to fabric, which creates a more flexible and lightweight reflective option. While ideal in many environments, especially warm ones, its largest drawback is that it loses reflectivity when wet and can abrade in rough environments.

Your garment's reflective material should stand out from the work environment.

Be seen in the best of class.

## Brisk Cooling Technology

HyperKewl™ Evaporative Cooling products utilize a unique chemistry to achieve rapid absorption and stable water storage. The chemical formulation also creates enhanced evaporation. Our HyperKewl™ fabric combined with our three-layer design helps to cool the user while they stay dry!

#### Evaporative Cooling Technology

- || Specialized fabrics and fibers create an advanced water management system, called 'HyperKewl'.
- || HyperKewl absorbs, stores and releases water within the multi-layered structure.
- || The fabrics cool itself through evaporation and a chill effect is created.
- || Users can expect the evaporative cooling fabric to provide temperatures that are up to 15-20% cooler than the ambient temperature.

Fully removable cooling pad.

Hook & loop for easy removal.

1. Submerge in clean water for 1-2 minutes.
2. Wipe off excess water.
3. Re-activate as needed.

Your brand, our quality.  
High-quality custom printing.

A name says a lot. Your name signifies who you are, what you stand for, and what you believe in. At ML Kishigo we believe in quality, and we can help you proudly display that name with high-quality, custom printing.

Our in-house graphic design and screen print facility services specialize in traditional screen printing, reflective graphic transfers and die-cut numbers and letters (reflective and non-reflective). We'll provide best practice solutions ensuring the optimum application for your specific fabric—including expensive fire-resistant materials—to ensure your garments come out right the first time.

Plus, our imprint technicians rigorously test everything to make sure your items get the correct temperature requirements, eliminating shrinkage, unusual rippling of the tape or anything else that might distort your garments. Take out the guesswork and let our experts handle all your printing and graphic needs.

An American tradition  
of excellence.

The team at ML Kishigo understands we're only successful if you are, that's why from day one we've committed to partnering, listening, and learning from our customers to ensure we are keeping up with the world's highest standards...yours.

It's that commitment to quality that has made ML Kishigo what it is today, an American born company committed to excellence, service, and of course, the production of the very best products in the business, after all, quality is not an act, it's a habit, and we've been dedicated to delivering you the very best for over 40 years.

We want to thank you, for your support - it's an honor to be your partner.
